VISHAL GUPTA

Senior QA Engineer | Test Automation | API & AI Product Testing

+91-9650940227 | guptavishal049@gmail.com | linkedin.com/in/vishalguptacse | Ghaziabad, UP

PROFESSIONAL SUMMARY

Sr. QA Engineer with 6+ years across manual and automated testing, API validation, and mobile testing in Agile product environments. Currently leading QA for AI agent products at BlueStacks, including an LLM-driven Android UI automation agent and a sandboxed cloud Android platform. Hands-on with Cypress (JavaScript) and Pytest (Python) automation, REST API testing via Postman/Newman, SQL-based data verification, and JMeter load runs. Actively use Claude and Gemini in day-to-day QA workflows to accelerate test design, widen coverage, and cut repetitive manual effort.

SKILLS

Testing: Functional, Regression, Integration, Smoke, Sanity, API, Mobile (Android), Performance/Load, Exploratory, AI/LLM Validation, UAT

Automation & Tools: Cypress (JavaScript, Page Object Model), Pytest (Python), Postman, Newman, JMeter, Fiddler, Git, JIRA, Confluence, TestRail

Databases & Scripting: SQL, JavaScript, Python, PowerShell, Batch Script

AI / GenAI: LLM output validation, prompt-based agent testing, Claude, Gemini, ChatGPT for test case, test data, and script generation

Methodologies: Agile/Scrum, SDLC, STLC, Defect Lifecycle, Test Planning & Strategy, Risk Assessment, Release Management

PROFESSIONAL EXPERIENCE

BlueStacks — Sr. QA Engineer *Gurugram, India | Feb 2023 – Present*

- Lead QA for BlueAI, an LLM-driven agent that automates Android UI tasks from natural language prompts; design and execute 150–200 manual and automated test cases per feature covering skill creation, prompt parsing, and end-to-end agent execution.
- Validate LLM outputs for correctness, hallucinations, and edge-case behavior; own the e2e validation cycle from skill-design review through production rollout, including go/no-go input on release risk.
- Built a Pytest (Python) GUI automation suite using image-comparison libraries to validate emulator screen states across builds, cutting manual visual-regression effort every cycle.
- API testing with Postman collections and Newman for repeatable regression runs; Fiddler for traffic inspection across emulators and AI backend services.
- Wrote SQL queries (joins, filters, aggregations) to verify backend data integrity and prepare test data for agent and account-level scenarios.
- Configured test environments across Android versions, OS builds, and hardware/platform combinations to reproduce, isolate, and troubleshoot defects.
- Drove QA for OpenClaw (openclaw.ai), a sandboxed AI product; benchmarked module behavior against native Android to surface parity gaps before release.
- Identified critical P1/P2 defects per release across weekly EBF/enhancement cycles and monthly major launches; participate in defect triage, backlog analysis, and sprint estimation with PMs and developers.
- Built internal .bst and PowerShell utility scripts using Claude and Gemini to automate repetitive test setup, environment prep, and synthetic test data generation.
- Mentored 2 QA interns and onboarded new hires within a 12-person QA team; collaborated with 20–30 cross-functional engineers, designers, and PMs per release..

Dayal Infosystems — Sr. Software Engineer, QA *Meerut, India | Oct 2020 – Feb 2023*

- Built and maintained Cypress E2E automation suites in JavaScript using Page Object Model, custom commands, and fixture-based test data for production web applications; folded automated runs into regression cycles to shorten release verification.
- Authored test plans, scenarios, and test cases from scratch for new features; aligned coverage with product managers and developers during sprint planning and requirement analysis.
- Investigated production issues escalated by support; reproduced, root-caused, and tracked defects through resolution, using SQL queries against application databases and API/log inspection to isolate failures.
- Partnered with developers and designers in a high-iteration team to ship quality releases on tight timelines.
